

NEW

What's New in HEALTHe NL?

December 2020

IMMUNIZATIONS

The immunization tab has now been updated to include immunizations administered by a pharmacist and recorded in the Pharmacy Network. Previously, only immunizations recorded by community health clinics in CRMS were displayed here. Note that a dispense of a vaccine will not display here. These will continue to be found in the medication profile. The source of each immunization record will be displayed (pharmacy or CRMS) and users will be able to detail each record for further information.

The date of birth restriction that previously filtered out immunization records for patients born pre-2003 has been removed. All immunizations recorded electronically in CRMS since 2003 can now be viewed here for all patients.

eCONSULT

New Referrals Now Available

As of November 16, 2020, completed eConsults are available in HEALTHe NL under the Patient Summary tab.

ABOUT

eConsult is a collaborative online tool, available in HEALTHe NL that connects primary care practitioners and consultants for non-urgent patient assessment. It facilitates the quick exchange of clinical knowledge and expertise between disciplines and promotes informed clinical decision-making and optimizes patient care delivery.

BENEFITS

Increases patient safety

Improves patient outcomes

Improves access to specialist advice

Decreases wait times

Supports clinical decision-making

Reduces need for face-to-face specialist referrals

Utilizes HEALTHe NL

Enhances clinical knowledge

Optimizes referral process

Promotes efficient use of health care resources
