

Coming Soon!

Clinical Documents and Medical Imaging Reports from Central Health are coming this Summer/Fall 2018!

Improved Health
Through Quality
Information

eOrdering Referral tool New Update - June 10, 2018

Effective Sunday June 10, 2018 a **Referrals** tab will be added to HEALTHe NL. You will see **Referrals** tab between **Medication Profile** tab and **Immunizations** tab. **Referrals** tab will be used to access myCCath. myCCath is an application for approved clinicians to order cardiac catheterization.

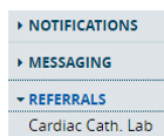

If you click on the **Referrals** tab, under a specific patient's record, myCCath will open auto populating the patient's demographic information into myCCath. Once it is opened, you can complete a referral for the Cath lab.

If you are not an approved user and click on the myCCath icon that appears when you click the Referrals tab, you will be prompted with the following message:

"If you feel that you require access to this functionality, please contact Eastern Health Cardiology on call: 777-6300."

In addition, under the homepage, left menu you will see a **Referrals** menu that allows you to access the myCCath by clicking on "Cardiac Cath Lab" then on myCCath icon. When you click on it, it will open myCCath displaying a list of referrals depending on your myCCath role assigned to you.

1. Click here.

2. Click on the myCCath icon that appears.

Labrador North Users

Labrador North users are able to view the Time Zone displayed on the header of each Clinical Document, Laboratory and Medical Imaging report in their local time zone (Atlantic AST). To know how to change the time zone [click here](#) to watch the video, or from the HEALTHe NL Homepage (left menu), click the Links menu and click the "Changing the Time Zone" link.

You will see NDT or ADT (Newfoundland/ Atlantic Daylight Saving Time) or NST or AST (Newfoundland/ Atlantic Standard Time) next to the time displayed in the header of the report.

Medication Profile

All 203 community pharmacies are connected to the Pharmacy Network.

Please note when completing your medication reconciliation, ensure "Active" and "Completed" statuses are selected. Completed status means the patient may or may not have finished their prescribed medication. For further information please refer to the HEALTHe NL Help Files page 90.

Available Information in HEALTHe NL

HEALTHe NL currently includes the following types of information:

- Patient medication histories from connected community pharmacies. We now have 100% of community pharmacies province wide connected.
- Eastern Health Meditech data, including dictated reports, laboratory results, diagnostic imaging and encounters (since April 2015).
- Provincial immunization data from a 2003 year of birth onward.
- Central (since September 2016) and Western (since June 2017) Health laboratory results and encounters.
- Western Health Clinical Documents and Diagnostic Imaging (since February 2018).
- Labrador Grenfell Health Clinical Documents, Laboratory Results, Diagnostic Imaging, and Encounters (since February 2018).

We love hearing from you!

Family physician Dr. Roy Chaulk is one of HEALTHe NL's biggest champions. [Click here](#) to see what he has to say about how he has integrated HEALTHe NL into his daily workflow.
